

## List of Compatible Plotter Devices

The list below reflects the plotter devices that 3M™ Pattern Marketplace is compatible with to ensure a smooth set up and cutting experience. The 3M Technical Support team will continue to help support many other plotter brands that use HPGL, GPKL or other communication languages but there is no guarantee for a successful set up experience. Additionally, based on the plotter connection type used (USB, Network, Bluetooth, Serial, Serial to USB, other/unknown) there still may be technical troubleshooting required to finalize the cutting experience.

We recommend setting up the Cut Agent and your plotter(s) when you register on the site to determine plotter compatibility.

The 3M Technical Support team will continue to add new devices to the list below as the device testing is completed and functionality is verified.

Contact Support for any Cut Agent and plotter set up or technical questions. The support team can be reached via email, phone, or using the support form.

Our Support Hours are Monday – Friday 8:00 AM - 4:30 PM CST

Phone: 1-800-3281684
